

AQUA DRAIN

KEEP WATER WHERE IT BELONGS

Designed by glass professionals for glass professionals, the **310 Aqua Drain** is an innovative bottom sweep for 3/8" swing doors that helps channel water back into the shower enclosure. Its durable two-piece polycarbonate design adjusts for both right- and left-swinging doors, making installation simple while reducing water escape.

310 Innovation

Our patented drain strips are designed to fit firmly in the bottom sweep channel and are tapered, allowing the water to drain effortlessly back into the shower or tub, not on the floor.
