

310 Tempering is proud to offer

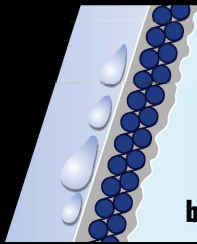

**310 MAX REPELS
WATER, DIRT,
SOAP SCUM,
MINERALS & MORE
BY CREATING A
RESISTANT BARRIER
ON GLASS**

The future of clean shower glass is here!

While regular cleaning is required on all coated glass shower enclosures, 310 MAX makes it easier! There is nothing on the market that makes a shower maintenance free, meaning that regular cleaning is essential to maintain that brand new spot free appearance. The fact is that over time, with regular use and maintenance, glass coatings begin to wear off. When you select 310 Max coating for your glass, we start with 310 Max, which is professionally applied by us during fabrication, plus every enclosure comes with a bottle of our 310 Max Clean & Restore. When used properly, 310 MAX C&R will not only clean your glass enclosure, it will actually replenish the protective coating with every use.

With 3D Nanocoat Technology

310 MAX
Nano-scale finish
repels water, soil
& stains for easy
removal and
brighter appearance.

PROTECTS CLEANS RESTORES

PROFESSIONALLY CLEANS & REPLENISHES GLASS WITH EVERY USE

Included with every order of glass with 310 Max finish is a bottle of 310 Max Clean & Restore for your customer! When used as directed, this product will not only clean their glass to a streak-free shine, it will restore their 310 MAX coating for maximum life.

No Toxic Chemicals

Makes Cleaning Easier

Safe to use on shower glass and enclosures, windows, plastics, tables, windshields, counters, sinks, faucets, mirrors and stainless steel.

For best results, we recommend owners use 310 Max C&R at least once per week. This will clean and rejuvenate their 310 Max coating. Easy to use, simply spray the surface and wipe with cloth until dry.
